

Wednesday May 30th 2018

Welcome and opening remarks

09.30

Chairs: Tore B. Stage, University of Southern Denmark and Kim Brøsen, University of Southern Denmark

Plenary 1 - Novel methods for assessing drug toxicity

09.45

Chair: Tore B. Stage, University of Southern Denmark

iPSC-derived sensory neurons to assess chemotherapy-induced sensory neuropathies

Deanna L. Kroetz, UCSF

Novel in vitro systems for better prediction of drug metabolism and hepatotoxicity

Magnus Ingelman-Sundberg, Karolinska Institutet

Coffee

11.15

Keynote 1 - Pharmacogenetics of glucose-lowering drugs

11.45

Chair: Kim Brøsen, University of Southern Denmark

Pharmacogenetics of glucose-lowering drugs

Ewan Pearson, Dundee University

Lunch (possible industry-sponsored seminar)

12.45

Plenary 2 - Personalized medicine in oncology – success stories from the real World

13.45

Chair: Tore B. Stage, University of Southern Denmark

Phenotyping and genotyping in childhood leukemia - precision medicine in an international setting

Kjeld Schmiegelow, Copenhagen University Hospital

Parallel 1 - Next generation sequencing and rare variants in personalized medicine

Chair: Magnus Ingelman-Sundberg, Karolinska Institutet

Integrating rare genetic variability into preemptive pharmacogenomic advice

Volker Lauschke, Karolinska Institutet

Twin studies and systems pharmacology as innovative tools for clinical pharmacokinetics

Matthias Schwab, Dr. Margarete Fischer-Bosch-Institute of Clinical Pharmacology Stuttgart and University of Tuebingen, Germany

Parallel 2 - New aspects of P450 variability

Chair: Janne T. Backman, University of Helsinki

CYP2D6 pharmacogenetics: from a scientific cornucopia towards routine clinical practice

Andrea Gaedigk, Children's Mercy Kansas City

Clinical significance of cytochrome P450 mediated drug interactions

Kim Brøsen, University of Southern Denmark

Cytochrome P450 phenotyping and the microdosing approach

Gerd Mikus, Heidelberg University Hospital

14.45

Coffee and poster walks

16.45

Beer tasting (additional registration required)

20.00

Thursday May 31st 2018

Plenary 2 - Pharmacoepigenetics and biomarkers

09.00

Chairs: Ingolf Cascorbi, University of Kiel and Magnus Ingelman-Sundberg, Karolinska Institutet

miRNAs as mediators of drug resistance

Ingolf Cascorbi, University of Kiel

DNA Methylation of ADME Genes: Clinical implications

Pascal Fisel, Dr. Margarete Fischer-Bosch-Institute of Clinical Pharmacology Stuttgart and University of Tuebingen, Germany

Diagnostic and prognostic epigenetic biomarkers in cancer.

Carmen Jerónimo, University of Porto

Coffee

11.00

Parallel 3 - Role of the gut in ADME

Chairs: Mette Marie Hougaard Christensen, Odense University Hospital and Troels Bergmann, Odense University Hospital

Gut microbiome interactions with drug metabolism, efficacy, and toxicity

Ian Wilson, Imperial College London

Gut wall metabolism

Oliver Hatley, Certara

Parallel 4 - Personalized medicine: Cardiovascular disease

11.30

Chair: Niels Jessen, Aarhus University

Protein biomarkers for cardiovascular conditions - perspectives for personalized medicine?

Lars M. Rasmussen, Odense University Hospital

Inherited cardiac diseases and personalized medicine

Henning Bundgaard, Copenhagen University Hospital

Lunch

13.30

Key note 2 - The role of drug transporters in chemotherapy-induced toxicity 14.30

Chair: Tore B. Stage, University of Southern Denmark

The role of drug transporters in chemotherapy-induced toxicity

Alex Sparreboom, Ohio University

Poster viewing 15.30

Conference dinner - Hotel Storebælt (additional registration required) 18.30

Friday June 1st 2018

Plenary 3 - Drug transporters

09.00

Chair: Mikko Niemi, University of Helsinki

Assessing OCT-function in vivo using 11C-labeled metformin

Niels Jessen, Aarhus University

Pharmacogenomics of transporters; OATP1B1, BCRP, rare variants

Mikko Niemi, University of Helsinki

Coffee

11.00

Parallel 5 - Using big data to develop personalized medicine

Chairs: Kim Brøsen, University of Southern Denmark and Henrik Berg Rasmussen, University of Copenhagen

Personalized Medicine and big data in Immune Deficiency

Jens Lundgren, University of Copenhagen

Analyzing drug response data from medical records

Søren Brunak, University of Copenhagen

Danish National Health Registries and Pharmacogenetics in Psychiatry

Christiane Gasse, Aarhus University

Parallel 6 - Pharmacogenetics and adverse drug reactions

11.30

Chair: Per Damkier, Odense University Hospital

Challenges to the clinical utility of PGx in the prevention of adverse drug reactions

Henk-Jan Guchelaar, Leiden University Medical Center

Advances in PGx of adverse drug reactions

Munir Pirmohamed, University of Liverpool

The genetic basis of drug-induced liver injury

Ann Daly, University of Newcastle

Closing remarks and awards

13.30

Lunch – grab and go

14.00
